PROJECTS

Project #1: Off.com (Campaign)

URL: https://off.com/en/neverstartingtales

Role: Frontend Developer

Technical Environment: HTML5, SASS, CSS3, jQuery, TurnJS, Sitecore

Description:

"Never Starting Tales" was a campaign developed for OFF.com, a collection of reinterpreted fairytales – and see how they inspired families to spend more time outdoors, protected from mosquitoes.

Responsibilities:

- ✓ Involved in estimations of website
- ✓ Responsible for understanding user requirements and developing the application
- ✓ Writing down SASS, JS code, for making the websites responsive
- ✓ Coordinates with onsite Creative Agency for UI Designs

Project's #2: a) Windex b) Drano c) Salamander Care

URL: https://www.windex.com/   https://www.drano.com/en-us   https://www.salamandercare.com/en

Role: Technical Lead

Technical Environment: HTML5, SASS, CSS3, jQuery, Sitecore

Description:

Windex Glass Cleaner on your car's tinted windows, mirrors, glass, chrome, stainless steel, plastic, and vinyl surfaces. For a streak-free shine, clean car windows when the surface is cool and out of direct sunlight whenever possible.

Responsibilities:

- ✓ Involved in estimations of website
- ✓ Responsible for understanding user requirements and developing the application
- ✓ Worked as frontend developer and was responsible for writing bug free code
- ✓ Used Responsive design methodology for resolution friendly
- ✓ Keeping track of deliverables and managing the tasks via Azure DevOps
- ✓ Developed Atomic Components for reusability
- ✓ Closely monitoring the team during the development phase
- ✓ Used Component Library for the website
- ✓ Worked closely with BA & Creative Agency for smooth deliverables
- ✓ Used Component Library for the website

Project#3: BRAUN

URL: https://us.braun.com/en-us

Role: Frontend Developer

Technical Environment: HTML5, LESS, CSS3, jQuery, Slick Slider, jQuery PictureFill, matchHeight, Sitecore, Adobe Photoshop, Bit Bucket

Description:

Braun Project was completely a redesign with following grid system bootstrap and the backend is site core there were many challenges developing this website with Sitecore.

Responsibilities:

- ✓ Responsible for understanding user requirements, developing the application
- ✓ Worked as frontend developer and was responsible for writing bug free code
- ✓ Developed Atomic Components to be used across the entire website
- ✓ Used Responsive design methodology for resolution friendly

Project#4: Target (m-web) & Red Card

Role: Frontend Developer

Technical environment: HTML5, CSS3, jQuery, PHP

Description:
Mobile Target is an E-Commerce Website provides the use of the Internet to sell online market products and provide information on the product.

Responsibilities:
- ✓ Responsible for understanding user requirements, designing and developing the application
- ✓ Worked as frontend developer and was responsible for writing bug free code
- ✓ Taken care of Accessibility, optimized images, reduced the size of the images by saving them on the right format, used sprite images wherever necessary thereby reducing http request
- ✓ Avoided Inline CSS & JS, reduced the number of DOM Elements by Minification
- ✓ Features Developed:
- ✓ - Stay on ATC (Add to Cart): This feature helps the user directly go to checkout or payment page from the product listing page by skipping the "product detail page and cart page" and developed an overlay based on the JSON response and display it
- ✓ DVM Ads: To Display google ads after second item in list view and fourth item in the grid view.
- ✓ Development of the GAM Pages
- ✓ Worked closely with QA for good product delivery
- ✓ Unit Testing

EDUCATION & QUALIFICATIONS

- ✓ Bachelor in Computer Application from KSOU University.
- ✓ Diploma in Printing Technology from Board of Technical Education.
